**Student Learning Outcomes:** Upon completion of this course and receiving a passing grade, the student will be able to:

1. Use the concepts of definite integrals to solve problems involving area, volume, work, and other physical applications.
2. Use substitution, integration by parts, trigonometric substitution, partial fractions, and tables of anti-derivatives to evaluate definite and indefinite integrals.
3. Define an improper integral.

8. Use the concept of polar coordinates to find areas, lengths of curves, and representations of conic sections.

**Student Learning Outcomes Assessment:** Pre- and post-test questions will be used to determine the extent of improvement that the students have gained during the semester.

**Course Evaluation:** There will be departmental final exam questions given by all instructors. Assignments will count for 20% of the final grade, while exams count for 80% of the final grade. Expect 22 assignments, 18 quizzes, and 4 scheduled exams throughout the course. Your final average in the course will determine the letter grade posted on your transcript. This grade is determined by the following scale:

A (90-100%), B (80-89%), C (70-79%), D (60-69%), F (0-59%).

- Assignments/Quizzes (22 assignments, 18 quizzes) = 20%
- Exam 1 (covering Assignments 0-6) = 20%
- Exam 2 (covering Assignments 7-12) = 20%
- Exam 3 (covering Assignments 13-17) = 20%
- Exam 4 (covering Assignments 18-22) = 20%.

**To maximize your potential for successfully completing this course:**

- login to Blackboard daily;
- watch the lecture videos and take notes on them;
- thoroughly complete and submit the assignments on time;
- practice the exercises repeatedly until you have full mastery of them.

**Attendance/Student Engagement Policy:** Attendance and engagement are the most critical activities for success in this course. The instructor maintains records of the student's attendance and submission of assignments throughout the semester. The student is expected to attend at least eighty percent (80%) of the total class meetings and submit at least eighty percent (80%) of the total class assignments to have the best chance of success. If the student fails to meet these minimum requirements, the instructor may remove the student from the class with an X, upon their discretion, to help the student from harming their GPA. If the student cannot receive an X, the instructor will assign an F.

Before arriving for the class meeting, make certain you have

1. worked through the notes and videos for that week's lessons;
2. completed some of the assigned exercises.

Upon arriving at the class meeting, we will

1. answer questions over exercises;
2. work through exercises;
3. submit assignments and quizzes.

Major exams will be at specified face-to-face meetings in TA213 from 8:30-10:35am with the exception of the final exam, which is on Monday, December 13 from 8:00-10:00am.
